Screening Questionnaire

Wildlife Management and Monitoring Plan

June 2019

Government of Northwest Territories

Purpose

This screening questionnaire is a tool to be used by the developer to determine the potential impacts of their developments on wildlife and wildlife habitat to inform decisions about mitigations. It is intended to provide the GNWT with basic information about the location, timing, scale and nature of a development in order to assess whether any one of section 95(1) (a-d) of the *Wildlife Act* would apply and a WMMP required for the project.

This questionnaire should be filled out by the developer once they have determined the development is not exempt from the requirement for a WMMP (<u>Section 3.1.4 of the WMMP</u> <u>Process and Content Guidelines</u>).

Resources

The following information sources can be used to help answer the questions in the questionnaire:

- NWT Species at Risk website and booklet (www.nwtspeciesatrisk.ca/content/documents)
- Recovery strategies, management plans, status reports, manuscript reports, file reports (www.enr.gov.nt.ca/en/resources)
- NWT Species and Habitat Viewer (under construction)
- Important Wildlife Areas in the NWT (Wilson & Haas 2012) (www.enr.gov.nt.ca/sites/enr/files/221 public no appendix c.pdf)
- Data requests to ENR's Wildlife Management Information System (<u>www.enr.gov.nt.ca/en/services/research-and-data/wildlife-management-information-system</u>)
- NWT Discovery Portal
 (nwtdiscoveryportal.enr.gov.nt.ca:8080/geoportal/catalog/main/home.page)
- Critical Breeding Periods for Raptor Species of the Northwest Territories (www.enr.gov.nt.ca/sites/enr/files/raptor species breeding periods.pdf)
- Land use plans and supporting documentation
- Ecological assessments for existing or proposed protected areas
- Engagement with communities, renewable resources boards, renewable resource councils, hunter and trapper committees and Indigenous governments and organizations

WILDLIFE MANAGEMENT AND MONITORING PLAN SCREENING QUESTIONNAIRE

Developer Information (Person or Registered Company)			
Full Name:			
Company:		Job Title:	
Address:			
Email Address:			
Telephone Number:	Fax Numbe	٠ ۲:	
Project Type			
Please " \checkmark " all that apply.			
Mineral exploration	🗌 Upgrad	ling of seasonal roads to all-season roads	
Oil and gas exploration and development	🗌 Timber	harvesting	
Pipelines and gathering systems	Power	generation and transmission	
Mining and milling developments	🗌 Other ((please describe):	
New access for both all-season and winter roads			
Location			
Provide the project location as EITHER : 1) geospatial files (GIS data) submitted with the	nis screening d	ocument OR 2) a printed map AND coordinates for the four corners of a	
box that encompasses all components of the project. Please specify the coordinates i	-	ees. If in UTM, please specify the datum and zone.	
NW	NE		
SW	SE		
Dates	5 I.D. I		
Start Date:	End Date:		
Period of operations within a given year (check all that apply):	1		
Spring (March-May) Summer (June-Aug) Fall (Sep-Nov)	🗌 Winter	r (Dec-Feb) 🗌 Year Round	
If a project is seasonal, provide the specific dates within each season	where activ	ities will take place.	

Which ranges of big game species does the project location overlap with?			
Please "🗸 " all that apply. For Bison and Caribou, please indicate which sub-species, ecotypes, and populations/herds apply (e.g. Barren-ground Caribou – Bathurst Herd, Wood Bison – Mackenzie Population)			
Species	Comments		
Bison			
🗆 Coyote			
□ Wolf			
Cougars			
□ Wolverine			
🗌 Mountain Goat			
Dall's Sheep			
🗌 Black Bear			
Grizzly Bear			
🗌 Polar Bear			
□ Moose			
🗌 Caribou			
Muskox			
U White-tailed Deer			

Which ranges of species at risk does your project overlap with?			
Please "🗸 " all that apply. Based on the NWT Species at Risk booklet and website, list the territorially managed species at risk your project overlaps with.			
Mammals	Insects		
Barren-ground Caribou	🗌 Gypsy Cuckoo Bumble Bee		
🗆 Boreal Caribou	Transverse Lady Beetle		
Collared Pika	🗆 Western Bumble Bee		
Dolphin and Union Caribou	Yellow-banded Bumble Bee		
🗌 Grizzly Bear	□ Other (specify):		
Little Brown Myotis	□ Other (specify):		
🗌 Northern Mountain Caribou	Amphibians		
Northern Myotis	🗆 Northern Leopard Frog		
🗌 Peary Caribou	🗆 Western Toad		
🗌 Polar Bear	□ Other (specify):		
	□ Other (specify):		
Wood Bison	Plants		
□ Other (specify):	🗌 Hairy Braya		
□ Other (specify):	□ Mackenzie Hairgrass		
Birds	Nahanni Aster		
Peregrine Falcon (anatum/tundrius complex)	□ Other (specify):		
Rusty Blackbird	Other (specify):		
Short-eared Owl			
□ Other (specify):			
□ Other (specify):			

Does your project overla	p with or is it in proximity (<2 km) to	o:
☐ Yes ☐ No ☐ Unknown	An important wildlife area (as identified in Wilson and Haas 2012)?	List the areas that apply:
☐ Yes ☐ No ☐ Unknown	An area identified as critical habitat for a federally-listed species at risk?	List the species that apply:
Yes No Unknown	An area identified as designated habitat for a territorially-listed species at risk?	List the species and habitats that apply:
Yes No Unknown	A known or suspected winter or maternal den site for big game or prescribed wildlife?	Please provide details:
☐ Yes ☐ No ☐ Unknown	A calving or lambing area for big game?	Please list the species that apply:
Yes No Unknown	A known or suspected bird nesting site (only applies to territorially managed birds that meet the definition of prescribed wildlife as outlined in the WMMP guidelines)?	Please list the species:
Yes No Unknown	A known or suspected hibernaculum or overwintering site for a prescribed species (e.g. bat hibernaculum, amphibian/reptile hibernaculum or overwintering site)?	Please list all that apply:
Yes No Unknown	A known priority water crossing or land bridge for barren-ground caribou?	Please describe:
Yes No Unknown	A known key harvesting area for local communities?	Please describe:
☐ Yes ☐ No ☐ Unknown	Another important habitat feature not listed above?	Please describe:

A) Activities that may result in significant disturbance to big game or other prescribed species					
Disturbance type	Frequency of disturbance events (# of events per unit time)	Duration of each disturbance event	Total duration over which disturbance events will occur	Timing	Extent of area within which disturbance events will occur
Use the following categories to describe each of the applicable activities for the project	 Continuous >1/hour >1/day >1/week >1/wonth >1/year 	 <1 min >1 min >10 min >1 hour >6 hours >12 hours Continuous 	 <1 day 1 day to 1 week 1 week to 1 month 1 to 3 months 3 to 6 months 6 to 12 months >12 months 	 Spring Summer Fall Winter Year Round 	 <1 ha 1 to 10 ha 10 to 25 ha 25 to 50 ha 50 to 100 ha 100 to 500 ha 500 to 1,000 ha >1,000 ha
Vegetation clearing using machinery					
Excavation					
Blasting					
Crushing					
Drilling					
Seismic testing					
Operation of heavy vehicles or machines (≥ 5 tonnes)					
Vehicle traffic on roads					
Low-level aircraft flights (<1,000 Ft altitude)					
Other (please describe):					

B) Activities that may substantially alter, damage or destroy habitat				
Disturbance type	Linear F	eatures	Total Area affected (m ²)	
	Average width (m)	Total Length (m)	(for linear features use average width X total length)	
Vegetation clearing (including timber harvesting)				
Stripping of soils or removal of overburden				
Excavation (including mining and quarrying)				
Terrestrial seismic exploration				
Access roads, trails, cleared right of ways				
Drainage of water bodies or wetlands				
Flooding of terrestrial habitat				
Trenching				
Above ground structures (pipelines, utility lines, fences, buildings)				
Other (please describe):				
Other (please describe):				
Combined total footprint for all activities undertaken				

C) Activities that may pose a threa	at of serious harm to wildlife or	, habitat
Activity type	Examples	Description
		(provide a description according to the examples provided below)
Vehicle traffic (collision risk)	Number and type of vehicles used, daily traffic levels	
Structures or physical habitat alteration that might cause entrapment, entanglement, electrocution or collisions with wildlife	E.g. fences, open pits, open trenches, netting, tailings ponds, tall structures and overhead wires	
On-site storage of wildlife attractants (e.g. food, food wastes, chemicals, petroleum products)	List the types of wildlife attractants to be stored onsite	
Potential for release of contaminants or accidental spills of toxic substances	E.g. fuel/chemical transportation and storage, tailings ponds, particulate emissions from dust, emissions from incineration or flaring, risk of spills or well blow-out	
Trigger a natural disturbance event such as fire, lands slide, avalanche, altered hydrology, thin ice or open water in winter	What activities might incur a risk of triggering one of the listed disturbance events?	
Risk of accidental damage or destruction of a nest, den, beaver dam or lodge, muskrat push-up or hibernaculum	E.g. vegetation clearing during summer, ice road construction during winter, operating machinery or blasting, flooding/ draining habitat	
Creation of new access into roadless area	Creation of new trails, access roads, or cleared right of ways, upgrading existing access to all-season road	
Creating an ecological trap	Creating habitat conditions that would attract wildlife to an area where they would be exposed to a higher risk of mortality than under normal circumstances	
Other (please describe):		

D) Activities that may significantly contribute to cumulative impacts on a large number of big game or other prescribed wildlife, or on habitat

 If the answer to any of these three questions is "Yes", and the project is deemed likely to satisfy the criteria for section 95(1)(a-c), then a further assessment will be conducted by GNWT to determine if the contribution to cumulative impacts might be significant.

 \[Yes \] No \] Unknown

 Does the project occur within the range of a wildlife species that is currently closed to resident, commercial or Indigenous harvest (e.g. barren-ground caribou herds)?

 Yes \] No \] Unknown

 Does the project occur within the range of Boreal Woodland caribou or on the annual range of the Bathurst herd of Barren-ground caribou?

 Yes \] No \] Unknown

 Does the project involve creating new all-season access (any length) or seasonal access >50 km in length into an area without current road access, or upgrading >25 km of existing seasonal access to an all-season road?
